DETAILED ACTION

This is in response to amendment filed on 2/19/07 in which claims 1-27 are pending. The applicant's amendments have been fully considered therefore this case is in condition for allowance.

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: The prior arts of record fail to anticipate or render obvious the following recited features: an expected sequence field, the expected sequence field to contain a first sequence of unscrambled values, wherein the first sequence of values is known by a receiver; and a synchronization field following the expected sequence field, the synchronization field to contain a second sequence of values scrambled by a scrambler as recited in claim 1. Using analog circuits to match samples of the detected signals with a copy of an expected sequence, wherein the expected sequence is transmitted as part of the preamble and enabling digital circuitry if the samples of the detected signals match the copy of the expected sequence as recited in claims 18 and 23.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
